

Dream Traditional Home Garden, Kalpakkam

I have 30 cents of land near Kalpakkam. I planned to construct a farm house and planned to establish a home garden. I have initially started with a garden. I have taken the services of Sempulam sustainable solutions private limited. I wanted my garden to have traditional tree crops with a forest atmosphere, which attracts birds, have religious values and medicinal values, traditional flowering plants, coconut trees with live fence crops like vitex, adathoda and glyricidia. I had discussed my requirements with the Sempulam Team.

After the completion of agreement procedures, Sempulam started the work from undergrowth clearance, layout finalization, field preparation, saplings and manures purchase, labour arrangements, providing on farm training to farm labourers, post planting monitoring visits on regular basis, handling of emergency conditions like cyclones, new pests and diseases on a regular basis. Our garden is complete with traditional tree crops, traditional flowering plants, coconuts and with fence crops. Sempulam team is associated with me since September 2018 onwards and in my experience they are an extremely dedicated Team. They deliver services on time with great efficiency.

Yours sincerely,
