FARM SCHOOL PROGRAMME FOR SPROUTS MONTESSORI SCHOOL FOR CHILDREN

Sprouts Montessori School for Children, Mylapore, Chennai has engaged a team of consultants from Sempulam Sustainable Solutions Private Limited, Chennai from the year 2016. Sempulam team has conducted organic farming and sustainable farming classes for the students of Early Adolescent class (Age group- 9-12 years) as theory class in the school premises and practical classes in their organic research farm (owned by Centre for Indian Knowledge Systems) near Vedanthangal. Sempulam team has developed the farm programme curriculum and implemented the same. Due to the constant support and effort of Sempulam, the students of Sprouts have learnt the basic concepts of organic farming technologies- compost production, preparation of growth promoters, identification of pest and diseases, biopesticides preparation, cultivation of paddy, vegetables and groundnut from seed to market level.

Sempulam team has also installed kitchen garden in all the four (4) premises of our School and helped us to maintain the gardens in an organic way. Students of Sprouts have also learnt basic cultivation aspects of vegetables. Apart from the school garden, the team also prepared kitchen garden kits for the students and supplied it to the School students, for learning vegetable cultivation in their home garden during the lockdown period. They continue to do the farm school programme through online classes now. We hope to expand this program in the coming years in a big way. Team Sempulam is technically very sound and capable.

Thanks and Regards,
