

## ***Beach view sustainable agriculture farm***

***We have one acre of land with a farm house in Akkarai, Sholinganallur, Chennai. I had decided to establish a horticulture garden with a lotus pond, fruit crops, vegetables and ornamental plants with the support of Sempulam sustainable solutions private limited, Chennai since September 2019. Sempulam started the work from undergrowth clearance, layout finalization, field preparation, saplings and manures purchase, labour arrangements, support for equipment purchase, providing on farm training to farm labourers, post planting monitoring visits on the regular basis, handling of emergency conditions like cyclones, new pests and diseases with regular basis. Our farm is now complete with fruit crops like guava, pomegranate, papaya, mango, lemon, ornamental plants, flowering plants, vegetables and a lotus pond. We are now harvesting vegetables regularly, flower crops have started blooming, lotus garden with lovely lotus flowers and fruit crops have started yielding fruits. After the establishment, Sempulam started their journey with us by the way of providing post planting monitoring visits for post planting operations like training and pruning, manuring, proper watering, plant protection etc., on a monthly basis. We are very happy about the services provided by Sempulam towards achievement of our dreams on establishment of a beach view sustainable agriculture farm.***
