

I am Hayagreevan, Chief Financial Officer, Turbo Energy Pvt Ltd, Sholingur residing at TTK Road, Chennai. I have 3 acres of land at Old Kesavaram village near Thakkolam. When I decided to start my farm work with sustainable agriculture technologies, I identified Sempulam Sustainable Agriculture Solutions, Chennai who provide end to end solutions on sustainable agriculture. They supported me from farm layout to field preparation, helped with required inputs arrangements including planting materials, manures and plant protection materials, adoption of water conservation techniques like Drip irrigation, labour arrangements for various works, support from farm implements purchase, providing training to farm hands, post planting monitoring on a regular basis, handling of emergency situation like cyclones, and emerging new pests. Major crops in my farm are coconut along with fruit crops like mango, pomegranate, kamala orange, jack, jamun, sapota, amla, banana and now almost all the crops have started yielding as organic products. I also have a small flower garden with tube rose, rose, jasmine, medicinal plants like tulsi, vallarai etc.. Sempulam team is associated with me since 2014 onwards and in my experience they are an extremely dedicated team. They deliver services on time with great efficiency.
